

**IN THE DRAWINGS:**

Formal drawings are submitted as replacement sheets for the prior drawings in the application.

## **REMARKS**

### **Claims**

This amendment after allowance is filed in order to correct ministerial aspects (e.g., spelling, grammar and antecedent basis) in claims 25, 30, 43, 84, 85, and 105.

### **Drawings**

Substitute drawing sheets for Figure 1-11B are submitted with this Amendment. Entry of the substitute drawing sheets is respectfully requested as formal drawings for this application.

## **COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE**

In response to the Reasons for Allowance provided by Examiner in the Notice of Allowance, Applicants respectfully disagree with the Examiner's reasons. Applicants respectfully submit that it would not have been obvious to have, for example, "a plurality of keys arranged in a configuration having key rows oriented perpendicularly with respect to the long axis of the device, one of the key rows comprising successive keys representing the letters Q, W, E, R, T, and Y, wherein the plurality of keys comprises at least nine multi-value keys, each multi-value key associated with at least a primary value and a numeric secondary value, the at least nine multi-value keys having a common visual characteristic and being arranged to form part of the configuration, the at least nine multi-value keys further being arranged in a telephone keypad arrangement, the keys in the configuration comprising at least one key not having the common visual characteristic of the nine multi-value keys, the non-foldable keyboard located below a display screen along the long axis of the handheld device, wherein the plurality of keys further comprises an option key configured to set the plurality

of keys in one of a plurality of states, a first state corresponding to a single use of a numeric secondary value of a multi-value key, a second state corresponding to consecutive use of any numeric secondary value of the multi-value keys, and a third state corresponding to use of only the primary value of a multi-value key, and wherein in response to activation of the wireless telephone component, the least nine multi-value keys initially set to the second set and operable as touch-tone keys.” That is, it is the combination of elements as recited in, for example, claim 30, that would not have been obvious to one of skill in the art in view of the cited references, including the Motorola Accompli and V100.

Applicant respectfully requests entry of this Amendment After Allowance filed under 37 CFR §1.312 and the accompanying Remarks and Comments.

Respectfully Submitted,

Date: January 22, 2008
